JOURNAL OF MOLECULAR RECOGNITION (J. Mol. Recogn.)

CONTENTS

Volume 13 Numbers 1–6

Number 1 January/February 2000

Editorial
Are there two distinct research strategies for developing biologically active molecules: rational design and empirical selection?
M. H. V. Van Regenmortel 1

Native-like cyclic peptide models of a viral antigenic site: finding a balance between rigidity and flexibility
M.-L. Valero, J. A. Camarero, T. Haack, M. G. Mateu, E. Domingo, E. Giralt and D. Andreu 5

Membrane-perturbing activity of *Viperidae* myotoxins: an electrostatic surface potential approach to a puzzling problem
M. Falconi, A. Desideri and S. Rufini 14

Application of surface plasmon resonance for analysis of protein–protein interactions in the G protein-mediated signal transduction pathway
V. Z. Slepak 20

Conformations of nicotinamide adenine dinucleutide (NAD^+) in various environments
P. E. Smith and J. J. Tanner 27

Crystal structure of asparagine 233-replaced cyclodextrin glucanotransferase from alkalophilic *Bacillus* sp. 1011 determined at 1.9 Å resolution
N. Ishii, K. Haga, K. Yamane and K. Harata 35

The conformations of locked nucleic acids
M. Petersen, C. B. Nielsen, K. E. Nielsen, G. A. Jensen, K. Bondensgaard, S. K. Singh, V. K. Rajwanshi, A. A. Koshkin, B. M. Dahl, J. Wengel and J. P. Jacobsen 44

Forthcoming events 54

Number 2 March/April 2000

Review
Structure–activity relationships of ω-conotoxins at N-type voltage-sensitive calcium channels
K. J. Nielsen, T. Schroeder and R. Lewis 55

Influence of three-dimensional structure on the immunogenicity of a peptide expressed on the surface of a plant virus
K. M. Taylor, T. Lin, C. Porta, A. G. Mosser, H. A. Giesing, G. P. Lomonossoff and J. E. Johnson 71

Structures of the platelet calcium- and integrin-binding protein and the α_{IIb}-integrin cytoplasmic domain suggest a mechanism for calcium-regulated recognition; homology modelling and NMR studies
P. M. Hwang and H. J. Vogel 83

Fluorescence correlation spectroscopy: molecular recognition at the single molecule level
E. Van Craenenbroeck and Y. Engelborghs 93

Molecular recognition and binding of thermal hysteresis proteins to ice
J. D. Madura, K. Baran and A. Wierzbicki 101

Forthcoming events 115

Number 3 May/June 2000

Prediction of interaction partners for orphan nuclear receptors by prior-based protein sequence profiles
S. B. Nagl, S. Das and T. F. Smith 117

Effects on interaction kinetics of mutations at the VH–VL interface of Fabs depend on the structural context
M. Ben Khalifa, M. Weidenhaupt, L. Choulier, J. Chatellier, N. Rauffer-Bruyère, D. Altschuh and T. Vernet 127

Practical considerations in BIA/MS: optimizing the biosensor–mass spectrometry interface
D. Nedelkov and R. W. Nelson 140

Ionization state and molecular docking studies for the macrophage migration inhibitory factor: the role of lysine 32 in the catalytic mechanism
T. A. Soares, D. S. Goodsell, R. Ferreira, A. J. Olson and J. M. Briggs 146

Quantitative and sequence-specific analysis of DNA–ligand interaction by means of fluorescent intercalator probes
O. Kirschstein, M. Sip and L. Kittler 157

Forthcoming events 165

Number 4 July/August 2000

Review
Engineered protein scaffolds for molecular recognition
A. Skerra 167

Review
Drug-DNA recognition: energetics and implications for design
I. Haq and J. Ladbury 188

Binding of nascent collagen by amyloidogenic light chains and amyloid fibrillogenesis in monolayers of human fibrocytes
D. L. Harris, E. King, P. A. Ramsland and A. B. Edmundson 198

Molecular similarity analysis between insect juvenile hormone and *N*, *N*-diethyl-*m*-toluamide (DEET) analogs may aid design of novel insect repellents
A. K. Bhattacharjee, R. K. Gupta, D. Ma and J. M. Karle 213

Forthcoming events 221

Number 5 September/October 2000

Review
Molecular architecture and biorecognition processes of the cystine knot protein superfamily: part I. The glycoprotein hormones
M. T. W. Hearn and P. T. Gomme 223

Review
From gel filtration to biosensor technology: the development of chromatography for the characterization of protein interactions
D. J. Winzor 279

Elucidation of the mechanism of interaction of sheep spleen galectin-1 with splenocytes and its role in cell-matrix adhesion
R. Ramkumar and S. K. Podder 299

The role of the carboxyl terminal α-helical coiled-coil domain in osmosensing by transporter ProP of *Escherichia coli*
D. E. Culham, B. Tripet, K. I. Racher, R. T. Voegele, R. S. Hodges and J. M. Wood 309

Forthcoming events 323

Number 6 November/December 2000

Review
Insight into protein structure and protein-ligand recognition by Fourier transform infrared spectroscopy
C. Jung 325

Review
Mimotopes: realization of an unlikely concept
R. H. Meloen, W. C. Puijk and J. W. Slootstra 352

New feature of angiotensin-converting enzyme: carbohydrate-recognizing domain
O. A. Kost, N. V. Bovin, E. E. Chemodanova, V. V. Nasonov and T. A. Orth 360

Design, synthesis and evaluation of biomimetic affinity ligands for elastases
H. Filippusson, L. S. Erlendsson and C. R. Lowe 370

Phage-displayed peptides as biosensor reagents
E. R. Goldman, M. P. Pazirandeh, J. M. Mauro, K. D. King, J. C. Frey and G. P. Anderson 382

Survey of the 1999 surface plasmon resonance biosensor literature
R. L. Rich and D. G. Myszka 388

Corrigendum 409

Forthcoming events 411
